ACC 121	Prin of Managerial Acct
ACC 130	Business Income Taxes
ACC 150	Acct Software Appl
CIS 110	Introduction to Computers

Is this program for you?

The Accounting curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in the accounting profession. Using the "language of business," accountants assemble and analyze, process, and communicate essential information about financial operations.

What will your life be like as an Accounting student?

In addition to course work in accounting principles, theories, and practice, students will study business law, finance, management, and economics. Related skills are developed through the study of communications, computer applications, financial analysis, critical thinking skills, and ethics.

What are your potential opportunities with Accounting?

Graduates should qualify for entry-level accounting positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies. With work experience and additional education, an individual may advance in the accounting profession.

How do you get started?

Brunswick Community College adheres to the "open door" policy as established by the North Carolina State Board of Community Colleges; admission standards do apply. All students enrolling in an associate degree, diploma, or certificate curriculum at Brunswick Community College must be high school graduates or possess a GED or Adult High School Diploma. Application forms may be obtained in person or by contacting:

Student Development Office
910.755.7320 or 1.800.754.1050, Ext. 320

Each applicant receives an application packet, which contains the placement-testing schedule, information on financial aid, registration, and transcript request forms. Applications for admission should generally be submitted at least two weeks prior to registration.
